Draft Minutes of the Hucclecote Climate Change Action Group (HCCAG) Meeting

Date of meeting – Wednesday 18 May, 7.30

Those present – Ted Stevens, Dave Bentley, Andrew Pugh, Maria Clutterbuck (parish councillors) plus Luke Riley, Sorcha Anderson, Darren Macdonald, Sarah Shewan (local residents)

Apologies – Gem Urquhart (EDF), Sarah Watkins (HATS) and Chris Pitt (Benefact)

1	Review of the Scrapbook	ACTION
	Everyone was happy with the scrapbook and it can now be posted on	TS
	the HPC website	
2	Focussing the potential activities down to a manageable number	
	It was broadly agreed that we'd aim for around ten initiatives, and	
	we'd endeavour to select these based on a combination of their	
	positive environmental impact, their value for money, their	
	visibility/potential to inspire others, their income generation potential	
	(ie - if they could fund further actions) and how quickly they could be	
	set up. The ones we want to really focus on are set out below.	
3	Biodiversity themed actions	
	There was strong support for more wildflower planting, creating	
	allotments/a community garden, community composting and the 'Tiny	
	Forest' idea. All of these could potentially be delivered on The Mound	
	site. By the next meeting we should have a landscape plan for this and	
	much (if not all) of these features could be funded by the developer	
	(Bovis). Dave Bentley will explore each action and research any	
	additional costs that could still be incurred, and any other potential	BD
	sources of income.	
4	Traffic/Travel themed actions	
	The main actions to be progressed here are the Lift Sharing scheme	
	and promoting 'no car' days/weekends. We would also lobby the	
	county council re cycleway provision/links to the new cycleway spine	
	and education for scooter users. Andrew Pugh agreed to explore likely	
_	costs we might need for promoting lift sharing and 'no car' days.	AP
5	Energy/power/homes themed actions	
	There was strong support for a simple/honest Green Guide that would	
	explain what residents could do to minimise their energy costs. The	
	Guide could also provide tips on recycling/buying local and a wide	
	range of other 'eco' stuff. Ted offered to scope this further and identify	TS
	likely costs (and possible sponsorship/other funding).	15
	There was also interest in exploring how we might set up 'bulk buy'	
	discounts for things like solar panels, ASHP's and insulation. Sorcha	SA
	offered to find our more, speak to suppliers and work out how an	SA
	initiative like this could be run, promoted, and any costs.	

	It was also felt that Hucclecote Parish should always demand to TBC on	
	planning applications for new homes that the homes are built to low	
	energy specifications.	
	The idea that local businesses' might make their staff electric car	
	charging facilities available to nearby residents should be explored. Ted	TS/GU/CP
	will raise this with EDF and Ecclesiastical.	
6	Recycling and Waste themed actions	
	The idea of trialling a pop up 'Repair Shop' is already being explored by	CS
	Cat Swift.	
	There was also support for replacing some existing litter bins with	
	larger/better bins where people pre-sort their refuse. Maria will check	
	out costs and if any grants or other funding might help with this.	МС
	Sorcha volunteered to collate information on current ways in which	
	hard-to-recycle items can be disposed of, to see if there are any 'gaps'	SA
	that need filling. The information can also be used in the Green Guide.	
7	Communication/Inspiration themed actions	
	The idea of some sort of 'Sustainability Fair' with various	
	activities/demonstrations/stalls/'pop up' attractions etc was	
	supported, and could act as an effective launch event in 2023. Ted will	TS
	draw up a rough spec for this and identify likely costs.	
	There was also support for adjusting the parish signs adding something	
	like "Committed to becoming greener" under them. Ted will check out	TS
	costs for this too.	
8	Next Steps	
	Everyone agreed to circulate their thoughts and suggestions on the	ALL
	items identified above so that by the time we next meet (in July) we	_
	should have a good idea of the cost implications of the proposed	
	actions, and – if possible – the environmental impact/CO2 savings that	
	each might generate.
